^{*} The forest areas returned in the Agricultural Statistics do not agree in most cases with those stated in the reports on the administration of the Forest Department for various reasons, the chief amongst which are the following:—

(1) the administration reports relate exclusively to forests worked by the Forest Department, while the tables of agricultural statistics include, in addition, forest areas administered by district officers, and (2) certain village and other lands not covered by forest but worked by the Forest Department and returned as forest lands by that department are not treated as forests in the returns of Agricultural Statistics.

^{*} The figures represent the newly constructed block account.

(a) Owing to revaluation of assets, the depreciated value of buildings has been raised by Rs. 15,85,141. This accounts for the difference in the capital outlay to the end of the year 1027-28.

(b) Owing to further investigation into Block account the value of certain assets has been reduced by Rs. 7,476 and 18,599 in 1928-30 and 1931-32 respectively.
